

PRODUCT INFORMATION

Reference : FD-010-169

Technologies : 433 MHz, 125 kHz

DESCRIPTION

The yellow FDI remote control is suitable for many situations due to the integrated proximity function and its four buttons. It is therefore no longer necessary to hold a remote control and a badge at the same time, as the FDI remote control allows both remote and proximity access. For example, the first button on the remote control opens the gate while the second button opens the garage door. In addition, proximity is exploited on pedestrian access.

The remote controls have been manufactured to have a long service life. In addition, thanks to the metal eyelet, the key can be easily carried on the key ring. The serial number engraved on a recessed area allows for easy programming and identification. This guarantees the uniqueness of the remote controls.

KEY CHARACTERISTICS

- Size (L X H X P): 79x38x12mm
- Power supply: 3V flat lithium battery

- 8-character alphanumeric number etched
- Average battery lifetime: 22,000 taps
- Operating temperature: -10°C to + 60°C.
- Is used with the FD-020-185 (Wiegand) or FD-020-190 (2-SMART for iPassan) receiver

COMPLEMENTARY ASSOCIATED PRODUCTS

- FD-010-171 : Grey – 433 MHz – Remote control
- FD-010-172 : Blue – 868 MHz – Remote control
