

PRODUCT INFORMATION

Reference : FD-010-171

Technologies : 433 MHz, 13.56MHz, Mifare Classic

DESCRIPTION

The grey FDI remote control has the ability to adapt to a variety of situations as it allows proximity access with the built-in function or remote access with the four buttons. Therefore, there is no need to have a badge and a remote control at the same time. Among others, each button is used for one type of remote access and the proximity function is functional for pedestrian access.

The remote controls are very durable and have a metal eyelet for easy transport on a key ring. The serial number of the remote control is engraved on an indented area.

Exclusively for read-only remotes:

The remote controls all have an unchangeable code of 8 hexadecimal terms, which guarantees their uniqueness. This code is also engraved to simplify programming and identification. The remote controls can be added very quickly in the software by simply entering the engraved number or by presenting the remote control to the encoder.

KEY CHARACTERISTICS

- Size (L X H X P): 79x38x12mm
- Power supply: 3V flat lithium battery
- 8-character alphanumeric number etched
- Average battery lifetime: 22,000 taps
- Operating temperature: -10°C to + 60°C.
- Is used with the HF FD-020-185 (Wiegand) or FD-020-190 (2-SMART for iPassan) receiver

COMPLEMENTARY ASSOCIATED PRODUCTS

- FD-010-172 : Blue – 868 MHz – Remote control
- FD-010-169 : Yellow – 433 MHz – Remote control
