PRODUCT INFORMATION

Reference : FD-010-172

Technologies : 13.56MHz, Mifare Classic, 868MHz

DESCRIPTION

The remote control can be used in a variety of situations thanks to its built-in proximity and four buttons. Indeed, there is no need to have a remote control as well as a badge, since the 4 buttons of the remote control allow to manage different objects and the remote control itself acts as a badge for proximity access. For example, one button controls the opening of the gate while the second controls the garage door, etc.

The key ring of the remote control is equipped with a metal eyelet to preserve and guarantee the longevity of the remote control. In addition, the serial number of the remote control is engraved on a recessed area.

Only for read-only remote controls:

By presenting the remote control to an encoder or by entering the serial number of the remote control, the remote controls can be added to the access management software.

The engraved code ensures simple programming and identification. This guarantees the uniqueness of the remote controls.

KEY CHARACTERISTICS

- Size (L X H X P): 79x38x12mm
- Power supply: 3V flat lithium battery
- 8-character alphanumeric number etched
- Average battery lifetime: 22,000 taps
- Factory-coded, 4 billion combinations possible.
- Customization on request.
- Operating temperature: -20°C to+ 60°C
- Is used with the HF FD-020-186 (Wiegand) or FD-020-191 (2-SMART for iPassan) receiver

COMPLEMENTARY ASSOCIATED PRODUCTS

- FD-010-169 : Yellow – 433 MHz – Remote control
- FD-010-171 : Grey – 433 MHz – Remote control
