

PRODUCT INFORMATION

Reference : FD-020-173

Technologies : Mifare Classic

DESCRIPTION

The FDI biometric reader offers a comprehensive multi-technology RFID solution (fingerprint and proximity). This desktop reader is proposed with a USB output and operates with Mifare® Classic technology.

Characteristics:

- Enhanced security via dual ID (proximity + up to 2 fingerprints). CNIL-compliant (CNIL is the French national data protection authority)
- The fingerprint is not stored in the reader but converted to an algorithm that is saved to the key/pass.
- Access is granted by the controller and not by the reader. As such, there is no limit to the number of fingerprints per reader; the limit is the controller limit (100,000 for iPassan).
- SAFRAN Morpho biometric module

KEY CHARACTERISTICS

- Operating voltage: 5V via USB
- Resolution: 500 dpi
- Frequency: 13.56 MHz – FDI Mifare
- Operating temperature: -10°C to 50°C
- Storage temperature: -20°C to 70°C
- Size: (L x l x H) : 175 mm x 100 mm x 150 mm
- Weight: 815 g including metal stand
