

PRODUCT INFORMATION

Reference : FD-020-190

Protocols : 2 wires

Technologies : Mifare Classic

DESCRIPTION

The 433 MHz 2-wire HF receiver is designed for working with FDI access control systems. It is compatible with the following bi-technology remote controls:

- TM04 (125 KHz tag integrated / 433 MHz yellow keys)
- TELROL (integrated 433 MHz beacon) / 433 MHz

The remote controls also have an integrated tag (125 KHz or 433 MHz). One of the advantages of the system is that proximity readers also transmit the same serial number to the controller.

KEY CHARACTERISTICS

- Size (L x l x h) : 155 mm x 91 mm x 34 mm
- Protection rating: IP67
- Wiring: 2-wire
- 1 loop input
- Operating temperature: -20°C to +60°C
- Power supply: 12-24V (supplied by the controller)
- Reception distance: Up to 100 m in open-field conditions

COMPLEMENTARY ASSOCIATED PRODUCTS

- FD-020-191 : B2f 868 MHz HF receiver
