Description

Neius cameras are characterised by professional features and ease of installation. It is ideally suited for use in retail and residential applications, car parks, etc. The camera unit provides value-added interfaces, such as an integrated microphone, SD card slot and reset button in the hardware, and supports the two most commonly used VCA functions: tripwire and perimeter. Other features include the reachable distance of the IR illuminators, the Starlight feature and the IP 67 rating, which allows any type of installation.
