

urmet

Tabletop Design series 1-button remote control for Yokis UP Zigbee system, anthracite colour.

4820394

- Power supply: CR2032 lithium battery

- Battery duration: > 7 years
- Available channels: 1
- Number of receivers/channel: 4 in direct mode; unlimited in centralisation/scenario mode
- Range: 250m in free field of view and without obstacles. Range is reduced by metal items, walls or partitions.
- Radio protocol: Zigbee
- Frequency: 2.4 GHz
- Bidirectional transmission with notification LED on transmitter.
- Operating temperature: - 10°C to +50°C
- Relative humidity: maximum 80%
- Dimensions (L x H x D): 84 x 35 x 11.5 mm

Description

The TLC1-UP tabletop remote control is a universal Zigbee radio transmitter with 1 channel, capable of controlling all types of Yokis radio receivers (relays, dimmers, roller modules) and third-party lighting devices based on Zigbee 3.0 protocol.

This remote control can be used to manage not only direct commands, but also centralisation and scenario activation commands.

Thanks to the Zigbee radio protocol, it is also possible to transmit commands to modules that are not directly reachable by the transmitter, exploiting the repetition of the command by the actuator modules, and to transmit commands to groups of modules of different types (relays, dimmers, roller actuators, etc.).

It is easy to configure: either by the installer, via the device key or from the UP2Pro App, or by the user, from the YnO UP App.

It is possible to duplicate transmitters by copying the settings of the first one to the subsequent ones, without intervening on the receiver modules.

The remote control features designer style and premium materials: soft-touch keys and a body made of shock-resistant material.

The transmitter is powered by a standard CR2032 battery (average battery life greater than 5 years).

Accessories:

SUPTLC1-2-4-8TP (item no. 5454080) - wall-mounted
